

UNDER-RUNNING END TRUCKS

ACI End Trucks are manufactured in the USA from the highest quality materials. We offer the highest price-to-quality ratio on the market. We custom design our end trucks to meet your specific needs. You can count on our end trucks to continue doing their job long after you have finished yours.

Features

- Capacity Range: 1 to 5 ton (higher capacities available upon request).
- Fixed axle bores, machined from carbon steel and perfectly aligned.
- Standard wheel bases from 36" to 90" (custom lengths available).
- Voltage available in 230/460V, 3 Phase, 60Hz.
- Control Panel is an option, UL508A approved.
- Variable Drive is an option with custom settings.
- Single and Double Girder available.
- Available in hand-pushed, hand-gearred or motorized.
- Comes with everything. (No hidden fees)

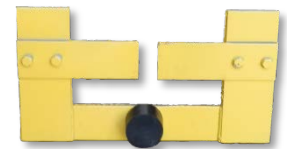

Wheels range from 5" to 12" diameter. They are hardened to 450-500 BHN, the hardest in the industry.

Bearings are precision machined and sealed. They exceed the life-time requirements for Class D CMAA rating.

30 Minute TENV rated with class "F" insulation. Heavy duty construction.

High grade rubber bumpers and steel rail sweeps are bolted on, allowing easy removal for replacement or maintenance.
