

Features

- Capacity range from 0.75 to 6 ton
- LH series is a universal manual hoist for lifting, tensioning, and lashing in any direction.
- Lightweight and small mounting sizes and small lever force at full load.
- Hand lever operates with little effort due to optimal gear ratio.
- The hoist is fitted with high grade alloy chain.
- Drop forged steel suspension & load hooks are heat treated and fracture resistant.
- Top and bottom hooks are fitted with safety latches as standard.

Hoist Construction

The steel body Lever Hoist/Puller is a dependable way to accurately position, load, and lift heavy, freely suspended loads within the hoist's rated load. The reversing lever and free-chain wheel provide ease of control even with work gloves. The hoist can be used in confined spaces due to the short handle and low handle chair.
